TECH STACK

- React, Next.js, TypeScript
- JavaScript (ES2020+)
- React Hook Form + Zod
- Schema-Based Validation
- Zustand, Redux
- TanStack Table
- TanStack Query, Optimistic Updates, Caching & Query Invalidation Strategies
- PNPM Workspaces, Turborepo
- Monorepo Design, Contract-Driven API Layers
- Tailwind CSS, Shadcn UI
- Radix UI, React Aria
- CSS Modules, styled-components
- Responsive & Mobile-First Design
- Accessible UI (WCAG principles)
- NextAuth (JWT sessions), OAuth 2.0
- REST, GraphQL, ky, axios
- Swagger / OpenAPI
- Vitest, Jest, React Testing Library
- Unit & Component Testing
- Storybook, Chromatic
- Cursor, Claude, Custom MCP tools
- AI-Driven Contract & Scaffolding Generation

PROFILE

Front-End Engineer with 10+ years of experience building scalable, maintainable, and user-centric web applications.
Specialized in architecting **React**/**Next.js** ecosystems with type-safe contracts, design systems, and monorepo-based platforms. Strong ownership mindset — leading features end-to-end from discovery and architecture to production rollout.
Strong experience in AI-assisted engineering (Cursor, Claude, MCP), leveraging LLM workflows for architecture design, refactoring, and development acceleration while maintaining production-grade code quality.

EXPERIENCE

SENIOR FRONT-END ENGINEER| GENTLECODE
WranglerAI Platform (Enterprise SaaS) | 2025 – Present

- Led the full lifecycle of complex enterprise features - from requirements clarification and architecture design to implementation, testing, and production rollout.
- Architected and maintained a scalable PNPM + Turborepo monorepo (Next.js applications + shared packages), improving code reuse, type-safety, and cross-team consistency.
- Designed and implemented advanced UI systems using React, Tailwind, Shadcn, Radix, React Aria, React Query, and custom hooks delivering accessible, performant, and maintainable user interfaces for complex enterprise workflows.
- Engineered complex state management using TanStack Query and Zustand, implementing optimistic UI updates and granular cache invalidation to entirely mask network latency and reduce redundant backend calls.
- Integrated AI-powered engineering workflows using Cursor and Claude.ai, type-safe contract generation, architectural guidance, and large-scale code refactoring support.
- Developed custom MCP tooling enabling reliable Swagger analysis, schema resolution, and automated scaffolding of API layers (contracts → services → queries), significantly improving development velocity and accuracy.
- Collaborated effectively across the entire delivery chain — clarifying requirements with Product/BA, coordinating implementation with BE/FE teams, and working closely with QA to ensure high-quality releases.
- Enhanced developer experience through documentation standards, architecture consistency, code-quality guidelines.

SOFT SKILLS

- Cross-functional collaboration with BE, QA, and Product teams
- Business-to-Architecture Translator — turning “we need it ASAP” into scalable technical solutions.
- Strong ownership mindset — from discovery to production
- Adaptable, self-driven, and highly autonomous
- Design & System Thinking
- AI-augmented engineer — using LLMs as structured productivity tools, not as random code generators.

LANGUAGES

- English
- Ukrainian
- Russian

EXPERIENCE

FRONT-END ENGINEER | GENTLECODE
Gentle Code | FinTech CRM Solution (2020-2025)

- Developed and maintained high-performance front-end applications using React.js and TypeScript in a complex FinTech domain.
- Built reusable component libraries and custom hooks to ensure consistency, scalability, and faster feature delivery.
- Translated Figma designs into pixel-perfect, responsive UI components with strong focus on UX and accessibility.
- Implemented secure authentication and authorization mechanisms (OAuth, JWT, SSO).
- Wrote and maintained unit tests using Jest and React Testing Library, improving code reliability and reducing regressions.
- Optimized applications for cross-browser compatibility and multi-device responsiveness.
- Integrated front-end applications with GraphQL and REST APIs, ensuring efficient and predictable client–server communication.
- Optimized GraphQL data fetching strategies by reducing over-fetching and unnecessary re-renders, improving perceived performance and application responsiveness.
- Developed and documented UI components in Storybook, improving visibility, testing workflows, and cross-team adoption.

EDUCATION

Master’s Degree in Construction Engineering
Ukrainian National Academy of Railway Transport Kharkiv, Ukraine

FRONT-END ENGINEER | GENTLECODE
Gentle Code | CRM & Dispatch Platform (2016-2020)

- Designed and implemented a customizable, themeable UI component library using React and styled-components, enabling consistent design patterns across multiple internal products.
- Built reusable and scalable UI primitives adopted across dispatch, booking, and CMS modules.
- Implemented performance optimizations including memoization, lazy loading, and query refinement to enhance scalability of complex UI views.
- Implemented responsive design strategies to ensure seamless performance across mobile, tablet, and desktop environments.
- Refactored legacy codebases to improve performance, readability, and architectural consistency.
- Worked on the development of various user-facing components in ASP Classic and .Net application, including forms, modals, and data tables.
